To distribute this creation freely to any and all
Who have the eyes to see and the ears to hear
The mystery in which each and every one
Equally participates in so many ways.*

Preface

Greetings,

Herein is an incomplete selection of contemplative definitions for those who need to get a life, from a guy who needs one, too.

It is also blogged for online viewing:

An Incomplete Selection of Contemplative Definitions

<https://definitionsyajekim.blogspot.com/>

Writing has been an enjoyable process ever since I first began toying with prose; scribbling poetry, keeping journals, corresponding with friends and acquaintances during the college daze. The philosophical/mystical/whatever-you-want-to-call-them thoughts, that have been popping into mind since 1989, have always been very out-of-the-blue spontaneous. Nothing planned or forced about them. They are being shared on the off chance that others may find them of interest, though, quite frankly, it really does not matter if no one else ever even reads them, for I am, first and foremost, my own audience. I got mine, so to speak. I played my little part. I had my share of fun. And it is, as it has ever been, up to each to discern their own, on their own. There are really no followers in this Don Quixote quest; only earnest seekers, who waylay their desires and fears and dreads, enough to discern that which is the end to doubt, the end to dueling with windmills. “Yay” if it is your fate to figure it out. “Oh well” if it is not. And “so it goes” either way, really. Ecclesiastes 1:2 is always a good reminder: “Vanity of vanities,” saith the Preacher, “Vanity of vanities. All is vanity.” Awareness can only, with great effort, regain control, regain sovereignty, from the usurper, imagination, creator of all that is time, creator of all that is space. Creator of all that is illusion, has never has been anything more than illusion, will never be anything more than illusion. Only as real as the given moment.

“The Stillness Before Time” is the original work that came together in 1992, including mostly aphorisms, an essay, a newspaper question-and-answer, ten reflections, and lists of both movies and books. Though an early self-published version, long since edited and expanded, can be purchased at major booksellers, a downloadable copy is available, no charge, at the link below. There are also links to a variety of blogs of other creations by me, along with links to many writings of a similar nature, by thinkers and seers from across all times, across all geographies.

“The Ponderings of Yaj Ekim” is the second published book, and is both blogged and available as a PDF download.

The “Breadcrumbs” titles, published annually since 2015, all include the core chapters: Leftovers, Soundbites, Breadcrumbs. In the Breadcrumbs chapters, I unleash thoughts of a more personal nature than in the other two. All just to show I was ensconced in a living, breathing, relativity mundane, oftentimes foolish, mortal mind-body. An actor playing the hand that was dealt; same as everyone else, vain as everyone else. No need to sculpt me into more than I was. No need for myths, nor legends, nor fables, nor miracles, nor cult followings, nor any other fictions, any other absurdities, over to which the human mind, and all its imaginary history, has so often given itself. The Breadcrumbs chapters prove me again and again to be yet another Shakespearian player, as full of the limited and arbitrary as anyone else born into

this dream of space and time. So please be sure not to shape me, or these many random thoughts, into some dogmatic absurdity. Use them as a launchpad, not an orbit.

“The Return to Wonder” blog is a compendium of aphorisms not included in the three other works: The Stillness Before Time, The Ponderings of Yaj Ekim, and Breadcrumbs. It originally totaled 3,000 pages formatted in 300 ten-page chapters written since 1990-ish. A gradual editing that will likely never be completed, is changing that dynamic into something of a mishmash.

Please note that this sort of wordplay is very haphazard, way too much work to put into any order. Probably best read it in bits and pieces in the here and there. One of those open-to-any-page works. Especially well-suited for coffee shops, coffee tables, and porcelain thrones.

Also note that all writings are always subject to updates and editing, so if you are interested in the most current version – before this house of cards comes tumbling down, and the world grows large again – downloading PDF copies every once and a while might be a reasonable discipline. This applies especially to the current year of Breadcrumbs, which could well be an annual project until the last wheezing breath, though frankly, the temptation to stop writing entirely is not off the table. It is a pleasant way to pass some of the countdown remaining, but it is unlikely there is much ground that has not been wandered by this frame of reference far more than enough already. No matter how many times Sisyphus rolls the boulder up the mountain, it is more than a little doubtful that the blind men and their true-believer followers, will ever discern, ever realize, ever embrace, the elephant in the middle of the room, without fabricating some new form of absurdity. It is the way we roll, it is the way we have always rolled, it is the way we will, far more than probably, always roll. Every species has its limitations, and we have in this mind’s eye, far-exceeded ours.

That said, if you do find these many thoughts at all worth preserving, for whatever times are ahead for this world and all its life forms, please feel free to share them with others who might also appreciate them. Else they may well swiftly slip back into the timeless oblivion from whence they came.

So it goes, either way. I played my part, I said my piece, I had my fun.

All the best,

M

P.S. For best viewing online, using the largest screen you have available to explore my little theme park, is suggested. Scrolling down and down on a phone screen is just not going to give you the same entrée.

P.P.S. Regarding the name Yaj Ekim ... It is just a reverse spelling of the first and middle names ... Michael Jay Holshouser ... Mike Jay ... Yaj Ekim.

P.P.P.S. Coincidentally, make of it whatever you will, or will not, Yaj is an Indian boy’s name meaning worshipper, sacrifice, another name for Shiva, a sage. And Ekim is a Turkish name for October meaning “sowing” (of seeds). All kinds of absurdity can be read into that by the many so-inclined – none of which was in mind when I came up with the idea to reverse the letters to my name. See P.P.S. for details.

P.P.P.P.S. Yes, I am Shiva. And so are You. No, I am not Shiva. And neither are you. Irony and paradox rule.

There is really only one Way.
It is without division or boundary.
It is without name or theology.
Awareness is its scripture.
Here now, its venue.
You, its witness.
Your life, the journey.

that govern a person's behavior or the conducting of an activity:
medical ethics also enter into the question | a code of ethics.

- the moral correctness of specified conduct:
many scientists question the ethics of cruel experiments.

2 [usually treated as singular] the branch of knowledge that deals with moral principles.

Schools of ethics in Western philosophy can be divided, very roughly, into three sorts.

The first, drawing on the work of Aristotle,
holds that the virtues (such as justice, charity, and generosity)
are dispositions to act in ways that benefit both the person possessing them

and that person's society.

The second, defended particularly by Kant,
makes the concept of duty central to morality:
humans are bound, from a knowledge of their duty as rational beings,
to obey the categorical imperative to respect other rational beings.

Thirdly, utilitarianism asserts that the guiding principle of conduct
should be the greatest happiness or benefit of the greatest number.

your so-called newspaper is clearly not burdened by a sense of ethics:
moral code, morals, morality, values, rights and wrongs, principles, ideals,
standards (of behavior), value system, virtues, dictates of conscience.

evolution | ,i:və'lu:ʃ(ə)n, 'evəlu:ʃ(ə)n |
noun

1 the evolution of language: development, advancement, growth, rise,
progress, expansion, unfolding; transformation, adaptation, modification, revision.

2 his interest in evolution: Darwinism, natural selection.

The idea of organic evolution was proposed by some ancient Greek thinkers
but was long rejected in Europe as contrary to the literal interpretation of the Bible.

Lamarck proposed a theory that organisms became transformed
by their efforts to respond to the demands of their environment.

Lyell demonstrated that geological deposits
were the cumulative product of slow processes over vast ages.

This helped Darwin towards a theory of gradual evolution
over a long period by the natural selection of those varieties of an organism
slightly better adapted to the environment and hence more likely to produce descendants.

Combined with the later discoveries of the cellular and molecular basis of genetics,
Darwin's theory of evolution has, with some modification,
become the dominant unifying concept of modern biology.

A reflection by Joshua Ferris: Evolution implies in its most fundamental form
an organism's natural progression over the course of time, either by accident or by adaption.

This is quite different from how Darwinism has come to be used,
to the point that I would argue they are not really relatable.

In its most fundamental form, Darwinism implies a cutthroat competition
among any two things to guarantee the survival of the fittest.

While an organism may evolve over time by means of some natural and self-sustaining mechanism,
something locked in Darwinian struggle prevails over its terrestrial competition
through shrewd, violent, and/or unnatural means.

The difference has implications for certain judgments
moral, scientific, and metaphysical – we make about the world.

Darwinism frequently implies an agent, usually a human one,
aggressively seeking to triumph, while evolution is a process typically but not always
correctly assumed to be beneficial but godless, lacking an agent.
Those who might readily encourage a Darwinian wrestling match
might be expected to dismiss evolution out of hand.

(The senator from Kansas engaged in a Darwinian campaign to keep evolution out of the schools.)

excellence | 'eks(ə)ləns |
noun

the quality of being outstanding or extremely good:
a center of academic excellence | the award for excellence in engineering.

- *archaic* an outstanding feature or quality.

a center of medical excellence:

distinction, quality, superiority, brilliance, greatness, merit, caliber, eminence, preeminence, supremacy;
skill, talent, virtuosity, accomplishment, mastery.

Areté (Greek: ἀρετή), in its basic sense, means "excellence of any kind".

The term may also mean "moral virtue".

In its earliest appearance in Greek, this notion of excellence
was ultimately bound up with the notion of the fulfillment of purpose or function:
the act of living up to one's full potential.

Robert M. Pirsig, On the Nature of Arété,
Zen and the Art of Motorcycle Maintenance:

The hero of the Odyssey is a great fighter, a wily schemer,
a ready speaker, a man of stout heart and broad wisdom
who knows that he must endure without too much complaining what the gods send;
and he can both build and sail a boat, drive a furrow as straight as anyone,
beat a young braggart at throwing the discus,
challenge the Pheacian youth at boxing, wrestling, or running;
flay, skin, cut up and cook an ox, and be moved to tears by a song.

He is in fact an excellent all-rounder; he has surpassing arété.

Arété implies a respect for the wholeness or oneness of life, and a consequent dislike of specialization.
It implies a contempt for efficiency ... or rather a much higher idea of efficiency,
an efficiency which exists not in one department of life but in life itself.

guna | 'goonə |
noun

(in Vedanta) any of the three interdependent modes or qualities
of prakriti: sattva, rajas, or tamas.

Guṇa depending on the context means:
"string, thread, strand" or "virtue, merit, excellence" or "quality, peculiarity, attribute, property".

The concept is originally notable as a feature of Samkhya philosophy,
though possibly a later feature of it.

The gunas are now a key concept in nearly all schools of Hindu philosophy.

There are three gunas, according to this world view,
that have always been and continue to be present in all things and beings in the world.

These three gunas are called:
sattva (goodness, constructive, harmonious),
rajas (passion, active, confused),
tamas (darkness, destructive, chaotic).

All of these three gunas are present in everyone and everything,
it is the proportion that is different, according to Hindu worldview.

The interplay of these gunas
defines the character of someone or something, of nature,
and determines the progress of life.

Mu (negative)

The Japanese and Korean term mu (Japanese: 無; Korean: 무)
or Chinese wu (traditional Chinese: 無; simplified Chinese:
无), meaning "not have; without", is a key word in Buddhism, especially Zen traditions.

Some English translation equivalents of wú or mu 無 are:

"no", "not", "nothing", or "without"

nothing, not, nothingness, un-, is not, has not, not any

Pure human awareness, prior to experience or knowledge.
(This meaning is used especially by the Chan school)

A negative.

Caused to be nonexistent.

Impossible; lacking reason or cause.

Nonexistence; nonbeing; not having; a lack of, without.

The 'original nonbeing' from which being is produced in the Tao Te Ching.

In modern Chinese, Japanese and Korean it is commonly used in combination words
as a negative prefix to indicate the absence of something

(no ..., without ..., un- prefix), e.g., Chinese:

无-线; pinyin: wú-xiàn / mu-sen (無-線) / mu-seon (무-선) for "wireless".

In Classical Chinese, it is an impersonal existential verb meaning "not have".

The same character is also used in Classical Chinese as a prohibitive particle, though in this case it is more properly written Chinese: 毋; pinyin: wú.

The concept of relativity was set out in Einstein's special theory of relativity, published in 1905. This states that all motion is relative and that the velocity of light in a vacuum has a constant value that nothing can exceed. Among its consequences are the following: the mass of a body increases and its length (in the direction of motion) shortens as its speed increases; the time interval between two events occurring in a moving body appears greater to a stationary observer; and mass and energy are equivalent and interconvertible. Einstein's general theory of relativity, published in 1915, extended the theory to accelerated motion and gravitation, which was treated as a curvature of the space-time continuum. It predicted that light rays would be deflected and shifted in wavelength when passing through a substantial gravitational field, effects that have been experimentally confirmed.

CHOOSE THE RIGHT WORD

religious, devout, pious

Religious basically means ‘relating to a religion’ (the patriotic and religious duty of any Jew) or ‘believing in a religion’ (the word is regarded by many religious people with considerable disapproval), and both senses are neither critical nor approving. Only in the second sense can religious be used after the verb to be, or be qualified by an adverb, to express the degree of someone's commitment (he wasn't a churchgoer, but very religious). Sometimes it is used in an extended sense to suggest that someone attaches particular importance to a secular object or pursuit; there may be a critical suggestion that such devotion is misplaced (he always had a religious obsession with fame).

Devout is used to indicate a deep and genuine religious commitment (he was a devout Quaker and would not allow a pub in the village), and is an approving word. It is also used to convey total or uncritical enthusiasm for or commitment to a secular object (a devout soccer fan).

Pious, too, can convey religious commitment (donations to the Church from pious laymen) but is now mainly used pejoratively to denote hypocritical religiosity (I know what's under that pious face of yours).

yoga | 'yōgə |
noun

a Hindu spiritual and ascetic discipline,
a part of which, including breath control, simple meditation,
and the adoption of specific bodily postures, is widely practiced for health and relaxation.

The yoga widely known in the West is based on hatha yoga,
which forms one aspect of the ancient Hindu system of religious
and ascetic observance and meditation, the highest form of which is raja yoga
and the ultimate aim of which is spiritual purification and self-understanding
leading to samadhi or union with the divine.
